- 学术报告: Technologies for Transportation Electrification
- 报告人: Patrick Wheeler University of Nottingham UK
- 时间: 5月7日10:00-11:00
- 报告简介: This presentation will consider the roadmaps for transportation electrification and the technological developments which are going to be needed to make these visions viable. These developments and technology challenges will include the electrical drivetrain design and the applications of motor design and power converter topology choices as well as the impact of emerging technology advances including cooling techniques, integration, system optimisation and wide-bandgap semiconductors. The Challenges for Power Electronics or Electrical Machines experts will also be explored and case studies from aircraft, superbikes and trucks used to illustrate the approaches being taken.
